Art Unit 1713

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 6-27 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Takiguchi et al. or Diehl et al.

The rejection as set forth under 35 U.S.C. § 103 in Paper No. 12 is deemed proper and is herein repeated.

Applicants' newly amended claims as well as the remarks filed in support thereof have been fully considered but have been deemed to be not persuasive.

Applicants argue that the Takiguchi patent fails to teach the incorporation of a triblock, star, radial or multi-block polymer wherein the structures of these polymers are illustrated in the instant application. This is not persuasive. The Takiguchi patent is seen to call for styrene butadiene polymers and expressly set forth the coupling of such polymers which would result in a star shape polymer. Furthermore, the resins as disclosed in Takiguchi et al. are seen to be generic to block polymers. The polymers as shown in Takiguchi render obvious

applicants' instantly claimed block polymers given that there remain no limitations on the block length or structure of the blocks. The generic disclosure of the suitable resins within Takiguchi render obvious the broadly claimed block polymers.

Applicants then argue that the Diehl patent teaches adhesive compositions which incorporate the oils which are intended to be excluded from the instantly invention. Applicants further argue that the gel composition as claimed does not include a tackifying resin. This is not persuasive. The fact that a tackifying resin as shown in Diehl does not render the instantly claimed invention patentable. There is nothing in the claims or specification which would exclude a tackifying resin. Furthermore it is seen that the mineral oils as shown in Diehl are optional ingredients and added in such an amount so as to render the composition "substantially free of mineral oils." As such, the claims are not patentable.

THIS ACTION IS MADE FINAL. Applicants are reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a). The practice of automatically extending the shortened statutory period an additional month upon the filing of a timely first response to a final rejection has been discontinued by the Office. See 1021 TMOG 35.

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS

ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
